Welcome

Dear Colleague and Friends,

It is a great pleasure to welcome you to the 2014 Chang Gung Memorial Hospital International Conference on Minimal Invasive Thoracic Surgery in Dec-13 2014.

The Conference promises to offer a ground breaking scientific program that covers a wide variety of topics illustrating the latest scientific and clinical developments in the field of minimal invasive thoracic surgery. The conference has become the premier platform not only for the presentation of new science, but also for unique networking opportunities. With speakers and participants from around the world attending this meeting, it provides the ideal forum to discuss the latest findings, put them into context and really understand how it can affect your practice day to day. We have developed a stimulating program that includes Advanced thoracic surgery, Single Port VATS, Robotic thoracic surgery, Natural Orifice Surgery in thoracic disease.

We encourage you to participate actively in the discussions and hope the meeting helps in the exchange of information and development of new collaborations. Take advantage of the various networking opportunities the Conference offers.

We look forward to welcoming you to an inspiring, educational, and enjoyable program.
