

# THE TRAINING

## FUNDAMENTALS OBJECTIVE AND OVERVIEW

Edwards **Transcatheter** Heart Valve Fundamentals Training provides the requisite foundational knowledge and practical training to maximize clinical outcomes in transcatheter aortic valve replacement (TAVR) cases. In this intensive program, leading faculty including investigators from The PARTNER Trial—conduct comprehensive training on patient screening, procedural decision-making, technical tips, and management of potential complications.

This program is designed to provide a greater understanding of the following:

- Appropriate application of patient screening criteria, nuances and rationale
- Intricate details of procedural steps, technical tips, decision-making, and troubleshooting
- Strategies to avoid and manage potential complications

### TAVR Training Program

長榮桂冠酒店(台中) 中港廳 and 文心廳

**Sunday, 23 October 2016**
